Middletown Firm Collects over 100 Coats for Button up Connecticut

Middletown, CT (November 6, 2013) – Consulting Engineering Services (CES) kicked off the season of giving by hosting an interoffice coat drive. The whole staff worked together to promote the collection so that no adult or child would go without a proper jacket this winter. There was an overwhelming atmosphere of generosity within the firm as many employees donated multiple coats and some even purchased brand new coats to give. With a staff of 70, CES was able to surpass their original goal and collect 111 new and gently used coats to be donated to Button Up Connecticut.

Button up Connecticut is a New Britain based, 100% non-profit organization that collects winter coats for children and adults and distributes them to those in need through local non-profit agencies such as shelters, food pantries, children's homes, and more. The coats they collect are never sold and never provided to agencies that will then sell them to clients.

CES hopes that they will inspire other local companies to clean out their closets and donate to this great cause this winter season!

Consulting Engineering Services is a 70 person firm that specializes in mechanical, electrical, fire protection and plumbing engineering services for analysis, design, and construction administration. We also offer services such as technology and security design, communications solutions and systems commissioning. As a leader in sustainable building systems design, all of our design professionals focus on implementing energy saving designs on each of our residential and commercial projects.
